10 — AI Services

Nigeria-first practical playbook · Expanded 2026 edition
Prompts · Content · Images · Automation · Freelance packages

Sell AI-assisted outcomes · Not raw chatbot dumps
by chAs Technologies LLC · FinReels Research
2026-08-10

Contents

1. What AI Services Are (and Are Not)
2. Realistic Earnings 2026 — Nigeria, Africa, Global
3. Exact Nigeria Setup Order
4. Payment Rails
5. Service Packages That Sell
6. Tools Stack (Free to Paid)
7. Portfolio and Proof Without Experience
8. Platforms: Fiverr, Upwork, Selar, PromptBase
9. Africa Expansion Notes
10. Global / USD Reality
11. Ethics, Quality and Disclosure
12. Daily Operating System
13. Scams and Hard Safety Rules
14. 30 / 60 / 90-Day Path
15. Checklists and Field Workbooks

1. What AI Services Are (and Are Not)

You use AI tools (ChatGPT, Claude, Gemini, image models, automation builders) to deliver finished client outcomes faster: articles, product descriptions, social packs, prompt libraries, image concepts, simple chatbots, or workflow automations. The client pays for usable results and your judgment — not for pasting unedited AI text.

It is **not** selling access to free tools or claiming AI will replace all skill. Quality control, editing, and niche understanding separate professionals from spam.

2. Realistic Earnings 2026 — Nigeria, Africa, Global

Stage	Illustrative	Notes
Beginner gigs	NGN 30k-150k / mo	Fiverr/Upwork learning
Consistent AI content VA	NGN 150k-400k+	Retainers possible
Prompt packs / products	Variable passive+	Selar/Gumroad/PromptBase
USD specialist	\$500-\$2,000+	Automation / niche prompts

Project rates for prompt packages often sit in the tens of dollars; content packages scale with length and research. Track net after platform fees.

3. Exact Nigeria Setup Order

1. Free AI accounts (ChatGPT/Claude/Gemini) + CapCut/Canva if visuals.
2. Payoneer for international platforms.
3. Pick one offer: AI content, prompt packs, or image concepts.
4. Create 3 portfolio samples with before/after or process notes.
5. Fiverr gig or Upwork profile with clear deliverables.
6. Optional: sell prompt packs on Selar or PromptBase.

4. Payment Rails

Fiverr/Upwork → Payoneer → Nigerian bank. Local clients: bank transfer. Digital products: Selar (naira) or Gumroad-style platforms where payment works. Confirm each platform's payout method before building volume.

5. Service Packages That Sell

Package	Deliverable idea	Positioning
AI blog pack	Researched, edited articles	Not raw ChatGPT paste
Prompt library	10-50 niche prompts	Product or custom service
Social content pack	Captions + image concepts	Weekly retainers
Product descriptions	Ecom listings at scale	Clear brand voice
Simple automation	Zapier/Make workflows	After you can demo

6. Tools Stack

Start free. Upgrade only when client volume justifies cost. Combine AI draft + human edit. Image tools: respect commercial-use rules and platform policies. Automation: Zapier/Make free tiers for learning.

7. Portfolio From Zero

Publish sample outputs with brief process notes (prompt approach + editing steps). Spec work for a Nigerian SME niche is valid proof. Show quality difference between raw AI and your finished version.

8. Platforms

Fiverr (packaged AI gigs), Upwork (custom proposals), Selar (naira digital products), PromptBase (prompt marketplace), LinkedIn outreach to SMEs. Productise one offer before offering 'anything AI'.

9. Africa Expansion Notes

Same tools serve clients across Africa. Local language prompts and cultural context are advantages. Payment rails differ; plan for mobile money where needed.

10. Global / USD Reality

International clients pay for reliability and niche fit. Disclose AI assistance when required by platform or client policy. Never invent facts in AI-assisted research content.

11. Ethics, Quality and Disclosure

Edit for accuracy, originality, and brand voice. Fact-check. Avoid plagiarism. Disclose AI use when rules require it. Do not sell illegal or deceptive AI services (fake reviews, academic cheating).

12. Daily Operating System

Batch similar client work. Maintain prompt libraries. Review quality before delivery. Weekly: update portfolio with best outputs and request reviews.

13. Scams and Hard Safety Rules

- No paid 'AI certification' required to freelance on major platforms.
- No selling exam-cheating or fake academic papers.
- Platform escrow for new foreign clients.
- No OTP/BVN sharing.
- Respect tool terms and commercial image licenses.

14. 30 / 60 / 90-Day Path

Days 1-7: Tools + one package + 3 samples + Payoneer.

Days 8-30: First paid gig; refine prompts; collect review.

Days 31-60: Second offer or product pack; raise rates slightly.

Days 61-90: Retainer or automation upsell if skills support it.

15. Checklists and Field Workbooks

- AI accounts active
- One clear service package
- Three portfolio samples
- Payoneer verified
- Fiverr/Upwork profile live
- Quality checklist before delivery

Field Workbook 1 — AI Service Ops

Log jobs, prompts used, edit time, and client feedback. Nigeria: local SME content packs pay in naira; USD gigs need Payoneer. Never deliver unedited AI text as final work.

Field	Entry
Client / platform	_____

Closing Notes — Judgment Is the Product

AI multiplies speed; your editing, niche knowledge, and reliability create the value clients pay for. Nigeria-based freelancers succeed by productising clear packages and delivering human-finished work.

Start with one offer. Build reviews. Add products (prompt packs) only after you understand demand. Never sell academic dishonesty or deceptive automation.

Use this playbook as a field manual. Tools and policies change; verify current terms on every platform you use.
