11. Tracking, Reporting and Ethics
12. Weekly Operating System
13. Scams and Hard Safety Rules
14. 30 / 60 / 90-Day Path
15. Checklists and Field Workbooks

1. What Ads Management Is

You plan, launch, optimise, and report paid campaigns on Meta (Facebook/Instagram), Google, and sometimes TikTok. Clients pay a management fee; ad spend stays in the client's ad account. Results are measured in leads, sales, or cost per result — not vanity metrics alone.

2. Realistic Earnings 2026 — Nigeria, Africa, Global

Stage	Illustrative fee	Notes
Beginner local	NGN 50k-100k / client / mo	Transparent learning phase
Competent local	NGN 100k-250k / mo	With proof
Advanced / multi-client	NGN 250k-500k+	Case studies
USD media buyer	\$500-\$2,000+ / mo	After track record

Always separate management fee from ad spend. Underfunded campaigns fail even with good management.

3. Exact Nigeria Setup Order

1. Free Meta Blueprint / Google Skillshop learning + practice accounts.
2. Run small tests on your own or a friend's business (with permission).
3. Document before/after metrics honestly.
4. Offer management to 1-2 local SMEs with clear fee + spend split.
5. Weekly reports in plain language.
6. Build toward retainers, not one-off setups only.

4. Payment and Ad Spend Separation

Client owns the ad account and funds ads directly. You receive management fee via bank transfer. Never mix client ad money with personal funds. This protects both parties.

5. Meta Ads Fundamentals

Clear objective, concentrated budget, strong creative, sensible targeting, pixel/events where possible. Start simple: one campaign, few ad sets, test creatives. Optimise weekly based on cost per result.

6. Google Ads Fundamentals

Search intent keywords, tight ad groups, relevant landing pages, conversion tracking. Start with controlled daily budgets. Negative keywords reduce waste. Expert Mode gives more control than simplified defaults.

7. Packages and Rate Logic

Package	Includes	Fee idea
Setup only	Account + first campaigns	One-time
Monthly management	Optimisation + report	Retainer
Management + creative	Ads + basic design/copy	Higher retainer
Multi-platform	Meta + Google	Premium

8. Getting Clients and Case Studies

Local SMEs, ecom stores, coaches, clinics. Offer a clear scope. Share honest results (including what did not work). LinkedIn and WhatsApp networks matter in Nigeria.

9. Africa Expansion Notes

Payment methods and platform maturity differ by country. Skills transfer; local creative and offer knowledge win. Remote USD clients need strong English reporting.

10. Global / USD Media Buying

International clients expect tracking discipline, creative testing systems, and proactive communication. Certifications help credibility but results matter more.

11. Tracking, Reporting and Ethics

Report cost per lead/sale, not only reach. Disclose limitations of tracking. Do not promise guaranteed ROAS. Refuse offers that require deceptive ads.

12. Weekly Operating System

Check delivery and spend daily for active clients. Weekly: creative tests, audience tweaks, written report. Monthly: strategy review and budget recommendation.

13. Scams and Hard Safety Rules

- Never hold client ad spend in personal accounts.
- No guaranteed ROI promises.
- No black-hat or policy-violating tactics.
- Written scope and fee clarity.
- Client owns accounts and data.

14. 30 / 60 / 90-Day Path

Days 1-14: Certifications/practice + one test campaign with real metrics.

Days 15-30: First paid management client (even small).

Days 31-60: Systemise reporting; second client or raise fee.

Days 61-90: Case study + clearer niche (ecom, local services, etc.).

15. Checklists and Field Workbooks

- Platform learning completed
- Practice campaign documented
- Fee vs spend policy written
- Report template ready
- First client conversation
- Business Manager hygiene understood

Field Workbook 1 — Ads Ops

Log spend, results, and management fee. Nigeria: keep ad spend in client accounts. Optimise for cost per meaningful action. Report honestly.

Ads Launch Checklist 4

Complete before taking client ad budgets under management.

Check	Done
Platform learning done	☐
Practice campaign logged	☐
Fee vs spend policy	☐
Report template	☐
Client account ownership rule	☐
Pixel/tracking basics	☐
First pitch ready	☐
Ethics boundaries clear	☐

Closing Notes — Skill Is Measured in Cost Per Result

Ads management is a professional service: clients pay for judgment, testing discipline, and honest reporting. Nigeria retainers are realistic when you separate fees from ad spend and protect client account ownership.

Learn on small budgets, document real outcomes, then productise monthly management. Never promise guaranteed ROAS or run policy-violating ads.

Use this playbook as a field manual. Platforms change; verify current policies and payment rules before scaling client work.
