13. Scams and Hard Safety Rules
14. 30 / 60 / 90-Day Path
15. Checklists and Field Workbooks

1. What Dropshipping and POD Are

Dropshipping: you sell a product; a supplier ships it to the customer. You never hold bulk inventory. Print on Demand (POD): designs are printed on apparel/merch only after an order. Both reduce inventory risk but shift risk to shipping, quality, and customer expectations.

In Nigeria, long international shipping times and customs friction make pure AliExpress-style models harder than local or hybrid fulfilment.

2. Realistic Outlook 2026 — Nigeria Reality Check

Model	Pros	Main risk
Local dropship	Faster delivery, trust	Supplier reliability
Intl dropship	Huge catalog	Delays, customs, returns
POD global	No stock, brandable	Shipping cost to NG buyers
Hybrid	Speed + range	Ops complexity

Profit is not automatic. Marketing cost, failed deliveries, and FX can erase thin margins. Treat it as a real retail business.

3. Exact Nigeria Setup Order

1. Pick niche + confirm demand (not random viral products only).
2. Vet suppliers (samples if possible); prefer local for NG buyers.
3. Choose sales channel: Instagram/WhatsApp, Shopify, or local store tools.
4. Payment: Paystack/Flutterwave; clear shipping timelines.
5. Test order end-to-end before ads spend.
6. Write returns and delivery policy customers can understand.

4. Local vs International Sourcing

Local wholesalers (markets, manufacturers) support 2-5 day delivery narratives Nigerian buyers expect. International suppliers need honest lead times and margin for logistics surprises. Hybrid models are common among serious operators.

5. Print on Demand Path

Design-led brands can sell globally via Printful/Printify-style networks while using local printers for Nigerian customers when available. Margin = retail minus base print/ship cost. Quality samples matter before scaling ads.

6. Platforms and Payments

Shopify is global standard with apps; WooCommerce and Nigerian storefront tools reduce cost. Paystack/Flutterwave for NGN. Payoneer for some international setups. Social commerce remains a major sales channel.

7. Pricing, Margins and POD Risk

Price after product cost, shipping, ads, payment fees, and returns allowance. Pay-on-delivery increases non-collection risk if you prepaid the supplier. Prefer prepaid orders or controlled COD partners.

8. Marketing Without Burning Cash

Organic content and community first. Small ad tests with clear unit economics. Influencer micro-deals with trackable codes. Do not scale ads until delivery and support are stable.

9. Africa Expansion Notes

Cross-border logistics and payments vary widely. Local fulfilment partners often beat pure international dropship for regional customers.

10. Global / Diaspora Selling

POD and curated African products can serve diaspora markets with clearer shipping expectations. Brand story and quality control matter more than lowest price.

11. Operations, Returns and Legal Responsibility

You are typically the seller to the customer. Accurate descriptions, timelines, and refund handling are your duty even when a supplier ships. Document supplier agreements. CAC registration helps formality.

12. Weekly Operating System

Daily: process orders and customer messages. Weekly: review margins, failed deliveries, top products. Monthly: supplier scorecard and ad ROI.

13. Scams and Hard Safety Rules

- No 'guaranteed profit' dropshipping mentors requiring big upfront fees.
- Sample products before heavy marketing.
- Honest shipping times on every listing.
- Do not invent stock that does not exist.
- Protect customer data and payment flows.

14. 30 / 60 / 90-Day Path

Days 1-14: Niche, supplier tests, storefront skeleton.

Days 15-30: First real sales via warm traffic; refine ops.

Days 31-60: Tighten margins; limited paid tests.

Days 61-90: Double down on winners; formalise policies.

15. Checklists and Field Workbooks

- Niche chosen
- Supplier vetted / sample ordered
- Store or social shop live
- Payment + shipping rules clear
- Test order completed
- Returns policy written

Field Workbook 1 — Commerce Ops

Log orders, product cost, shipping, ads, and net. Nigeria: local fulfilment often converts better than long international waits. Never scale ads on untested suppliers.

Field	Entry
Orders	_____
Revenue	_____
Product + ship cost	_____
Ad spend	_____
Refunds / fails	_____
Net	_____

Quality: accurate photos · honest timelines · responsive support.

Safety: real suppliers, no fake stock, clear policies.

Dropship Launch Checklist 1

Complete before running paid ads at scale.

Check	Done
Niche validated	☐
Supplier sample OK	☐
Storefront live	☐
Payments working	☐
Shipping policy clear	☐
Test order done	☐
Support channel ready	☐
Margin calculator set	☐

Dropship Launch Checklist 2

Complete before running paid ads at scale.

Check	Done
Niche validated	☐
Supplier sample OK	☐
Storefront live	☐
Payments working	☐
Shipping policy clear	☐
Test order done	☐
Support channel ready	☐
Margin calculator set	☐

Dropship Launch Checklist 3

Complete before running paid ads at scale.

Check	Done
Niche validated	☐
Supplier sample OK	☐
Storefront live	☐
Payments working	☐
Shipping policy clear	☐
Test order done	☐
Support channel ready	☐
Margin calculator set	☐

Dropship Launch Checklist 4

Complete before running paid ads at scale.

Check	Done
Niche validated	☐
Supplier sample OK	☐
Storefront live	☐
Payments working	☐
Shipping policy clear	☐
Test order done	☐
Support channel ready	☐
Margin calculator set	☐

Closing Notes — Fulfilment Is the Product

Dropshipping and POD only work when delivery matches the promise. In Nigeria, local and hybrid models often outperform slow international catalogues. POD shines when design and brand story create willingness to wait or pay for global shipping.

Validate suppliers with samples, price for true costs, and do not scale ads on broken operations. You are the seller in the customer's eyes.

Use this playbook as a field manual. Logistics and platform fees change; verify current terms before heavy investment.
