1. What a Digital Agency Is

An agency sells packaged digital services under one brand: social, content, ads, web, SEO, creative — often as monthly retainers. You move from trading hours as a solo freelancer to selling outcomes with processes and, later, a small team.

Start narrow. A focused 'we run Meta ads + landing pages for local clinics' beats a vague 'we do everything digital'.

2. Realistic Earnings 2026

Solo operators may bill NGN 150k-700k+ combined retainers before heavy team costs. Small agencies scale higher with specialists. Profit depends on utilisation, scope control, and not underpricing.

Ad spend always stays client-owned and separate from fees.

3. Exact Nigeria Setup Order

1. Master 1-2 services from earlier hustles with case studies.
2. Name, simple site, rate card, contract template.
3. CAC registration when ready for formality.
4. First 2-3 retainer clients with tight scope.
5. SOPs for delivery and reporting.
6. Hire contractors only after cash flow is stable.

4. Service Menu Design

Productise: Social retainer, Ads management, SEO monthly, Website packages, Content packs. Bundles increase average deal size. Exclude chaos work that destroys margins.

5. Sales and Positioning

Niche verticals (ecom, education, health, faith, professional services). Case studies with metrics. LinkedIn + referrals. Proposals with clear deliverables and timelines.

6. Operations and Team

SOPs, shared drive structure, weekly client reports, tool stack (scheduling, ads manager, project board). Contractors for design/editing before full-time hires.

7. Africa / Global

Remote delivery enables cross-border clients. USD retainers need strong English reporting and timezone discipline. Local agencies win on relationship and Naira simplicity.

Service Packages / Rate Logic

Package	Scope idea	Pricing note
Single service retainer	SMM or Ads only	Entry
Growth bundle	SMM + content + light ads	Mid
Performance	Ads + landing + reporting	Higher
Full digital	Multi-channel	Premium

Scams and Hard Safety Rules

- Written contracts and scope for every retainer.
- Client owns ad accounts and domain assets.
- No guaranteed ranking or ROAS promises.
- Separate ad spend from agency fees.
- Pay contractors on time; protect reputation.

30 / 60 / 90-Day Path

Days 1-14: Learn core tools + build 2-3 portfolio samples.

Days 15-30: First paid client or first product sale; document process.

Days 31-60: Raise rates or add second offer; systemise delivery.

Days 61-90: Retainer or productised package; case study.

Launch Checklist

- Tools installed and practised
- Portfolio or product MVP live
- Payment rails ready
- Rate card / pricing set
- Outreach list of 20
- Delivery checklist written
